

# ENP 32 SP Portable Compactor

ENP 32 portable compactor is an easy to use waste compaction system designed to compact and contain wastes quickly and efficiently.

Fitted with a full height rear door seal as standard it has an enclosed hopper to improve hygiene and reduce odours. It is therefore ideal for applications involving semi-solid and liquid waste residues; typical users include food manufacturers, hospitals and hotels.

The ENP 32 Portable waste compactor can be supplied with a choice of loading configurations, including automatic bin lift attachments for wheelie bins and other containers, thereby enabling safe and efficient hands free loading of waste materials.

Standard features include:

- Wear resistant steel floor
- Integral electro-hydraulic power pack with three built in levels of protection
- Key switch operation
- Emergency stop
- Cycle selector
- Auto shut off, with 3/4 full and full warning lights.
